

```
from matplotlib import pyplot as plt
```

Recommended to use when we have 5 or less values to plot

✓ 1. Plotting the Pie Chart

```
slices = [30, 40, 20, 50] #sum needs not be 100
```

```
plt.pie(slices)  
plt.show()
```

✓ 2. Adding labels to the pie chart

```
labels = ['thirty', 'fourty', 'twenty', 'fifty']  
plt.pie(slices, labels=labels)  
plt.show()
```

✓ 3. setting edge color

```
plt.pie(slices, labels=labels, wedgeprops={'edgecolor':'black'})  
plt.show()
```

✓ 4. setting color of the slices

```
color = ['blue','red','yellow','green']

#hexadecimal color codes can also be used
plt.pie(slices, labels=labels, colors=color, wedgeprops={'edgecolor':'black'})
plt.show()
```

5. plotting real world data

```
labels = ['JavaScript', 'HTML/CSS', 'SQL', 'Python', 'Java']

slices = [59219, 55466, 47544, 36443, 35917]

plt.pie(slices, labels=labels, wedgeprops={'edgecolor':'black'})
plt.show()
```

6. Exploding the slice

```
explode = [0, 0, 0, 0.1, 0]

plt.pie(slices, labels=labels, explode=explode, wedgeprops={'edgecolor':'black'})
plt.show()
```

7. adding shadow to the chart

```
plt.pie(slices, labels=labels, explode=explode, shadow=True, wedgeprops={'edgecolor':'black'})
plt.show()
```

8. setting the starting angle

```
plt.pie(slices, labels=labels, explode=explode, shadow=True, startangle=90, wedgeprops={'edgecolor':'black'})
plt.show()
```

9. displaying percentage of each slices

```
plt.pie(slices, labels=labels, explode=explode, shadow=True, startangle=60, autopct="%0.1f%%", wedgeprops={'edgecolor':'black'})
plt.show()
```

Show Your Creativity

Covid 19 India Data as on 5th Sept 2020

```
import matplotlib.pyplot as plt
import pandas as pd
```

```
from google.colab import drive
drive.mount('/content/drive')
```
